

# Ship-generated waste

## Skien Harbour Terminal

All vessels calling at the Port of Grenland are obliged to give notice of arrival; including notification of ship generated waste for discharge.

Reception facilities for ship-generated waste have been established at Skien Harbour Terminal, see p. 2 for location.

The facilities are designed to handle waste disposal based on number of arrivals and need. The cost for delivering non-special fee waste is included in the port dues.

The reception facilities are equipped with a container for hazardous waste, general waste, and paper waste. Additionally, SHT can receive wooden waste.

For food waste originating outside the EU, or for large quantities of waste or residual waste such as oil, sewage and chemicals, please contact the shipping agent or Norsk Gjenvinning Industri to order its disposal.

### PROPER SORTING RESULTS IN LOWER COSTS AND A HEALTHIER ENVIRONMENT.

No.	Symbol	Description	capacity
1	 Farlig avfall <b>Hazardous Waste</b>	Hazardous waste is submitted here. Segregation is carried out as described in the container.
