

Ship-generated waste
TINFOS QUAY, PORSGRUNN

All vessels calling at the Port of Grenland are obliged to give notice of arrival; including notification of ship generated waste for discharge. Support is usually given by the agent and waste must be registered in SSN. Reception facilities for ship-generated waste have been established at TINFOS Quay, see below for location.

The facilities are designed to handle waste disposal based on number of arrivals and need. The cost for delivering non-special fee waste is included in the port dues. Note, waste incorrectly sorted can and will incur a charge associated with correcting sorting, this may include full cost for Rest Waste handling if it cannot be easily sorted.

The reception facilities are equipped with a container for hazardous waste, general waste, and paper waste. For large quantities of waste or residual waste such as oil, sewage and chemicals, please contact the shipping agent or Norsk Gjenvinning Industri to order its disposal.

GRENLAND HAVN IKS IS ISO14001 CERTIFIED AND HAS ENVIRONMENTAL PROCESSES HIGH ON ITS AGENDA. PROPER SORTING RESULTS IN LOWER COSTS AND A HEALTHIER ENVIRONMENT
